Symbol	Description
(1016)	Victorias PGY2 data only accounts for positions included in the Victorian HMO Match - recruitment to PGY2 positions also occurs in Victoria outside the match approximately 900 positions have been accredited in Victoria for PGY2 level doctors
(1018)	Queensland data is an approximate only and is based on the number of selections within the online e-Recruitment system utilised by Hospital and Health Services PGY2 data reflects applicants selected to a JHO (PGY2) position within Queensland who were not a JHO at the time of selection as some candidates (predominately international medical graduates) have been in a JHO position for 2+ years
(1017)	Irish medical graduates (year of qualification 2017)
(1019)	Payroll data was not suitable as a source of total PGY2 data as some hospitals do not separate JHO SHO positions (coded as RMOs) and would not meet the data parameters outlined by the Commonwealth
